PROJECTS

Online Hospital Appointment System   /Online-Hospital-Appointment-System

- Software Engineering Capstone
- Developed a web-based system for scheduling doctor appointments with SMS and email notifications.
- Led the front-end development of the system using React JS.

Guessing Game   /Hangman-Ballon

- Compiler Design and Computational Science Project
- Developed a word-guessing game inspired by the movie "Up," where players suggest letters to identify a word.
- Took part in the development of the front-end by implementing pop-ups and audio sound effects.
